

OptiSafe® Hand Cleaner

Item #C604

Item #C608

- Quickly Removes Dye Stains, Grease, and Dirt.
- No Oily Residue or Strong Odors.
- Safe & Gentle on the Skin
- Refreshes & Moisturizes

OptiSafe Hand Cleaner from Phantom Research Laboratories Inc., is especially formulated with opticians and optical lab workers in mind. It quickly removes dye stains, grease, and dirt without oily residue or strong odors. It rinses faster and cleaner than other similar products on the market today.

Before

In the formulation we used detergents instead of solvents, and special micro beads that are effective yet safe on the skin. We balanced 3 forms of energy, chemical, thermal, and physical, to remove dyes, grease, and dirt. Warm water provides the thermal energy, OptiSafe Hand Cleaner provides the chemical energy, and our micro beads provide the physical energy. Incorporating oil-free moisturizer and carefully balanced pH, the **OptiSafe Hand Cleaner** leaves skin feeling soft and refreshed.

After

Directions: Wet hands, apply 1/2 teaspoon of OptiSafe Hand Cleaner, Rub hands together well, then rinse with water (Warm water is recommended for optimal results).
